## TRANSMISSION

For unbeatable drive power in all conditions, the JCB Syncro Shuttle combines a 4-speed, fully synchromesh gearbox with integral torque converter and electrically operated reversing shuttle for smooth gear changes on the move and fast cycle times. Column mounted electric switch effortlessly controls machine direction changes allowing operator to keep hands on steering wheel.

Automotive style pedal layout and conventional H-pattern gear lever add to ease of operation. Travel speed 29.0km/h (18mph).

**Front drive axle:** JCB epicycle hub reduction drive axle with Max-Trac torque proportioning differentials.

**Rear steer axles:** JCB manufacture with hydrostatic power steering. Steer shock valve as standard.  
4WD versions with epicyclic hub reduction and Max-Trac torque proportioning differentials.  
2WD versions have a deadsteer axle as standard.

## BRAKES

**Service brakes:** Hydraulically activated, self-adjusting, oil-immersed in-board multi-disc type in front axle.

**Parking brake:** Hand operated disc brake on output of gearbox.
